ORLANSOFT DATA SYSTEM

About Us

PT Orlansoft Data System is an Enterprise Resource Planning (ERP) software company that has been in business since 1989 with customers in trading/distribution, manufacturing, and services throughout Indonesia. At Orlansoft, we are committed to build an Enterprise Business System that systemize and integrate business processes to help companies optimize the use of enterprise resources across entities and sites.

QUALITY POLICY:

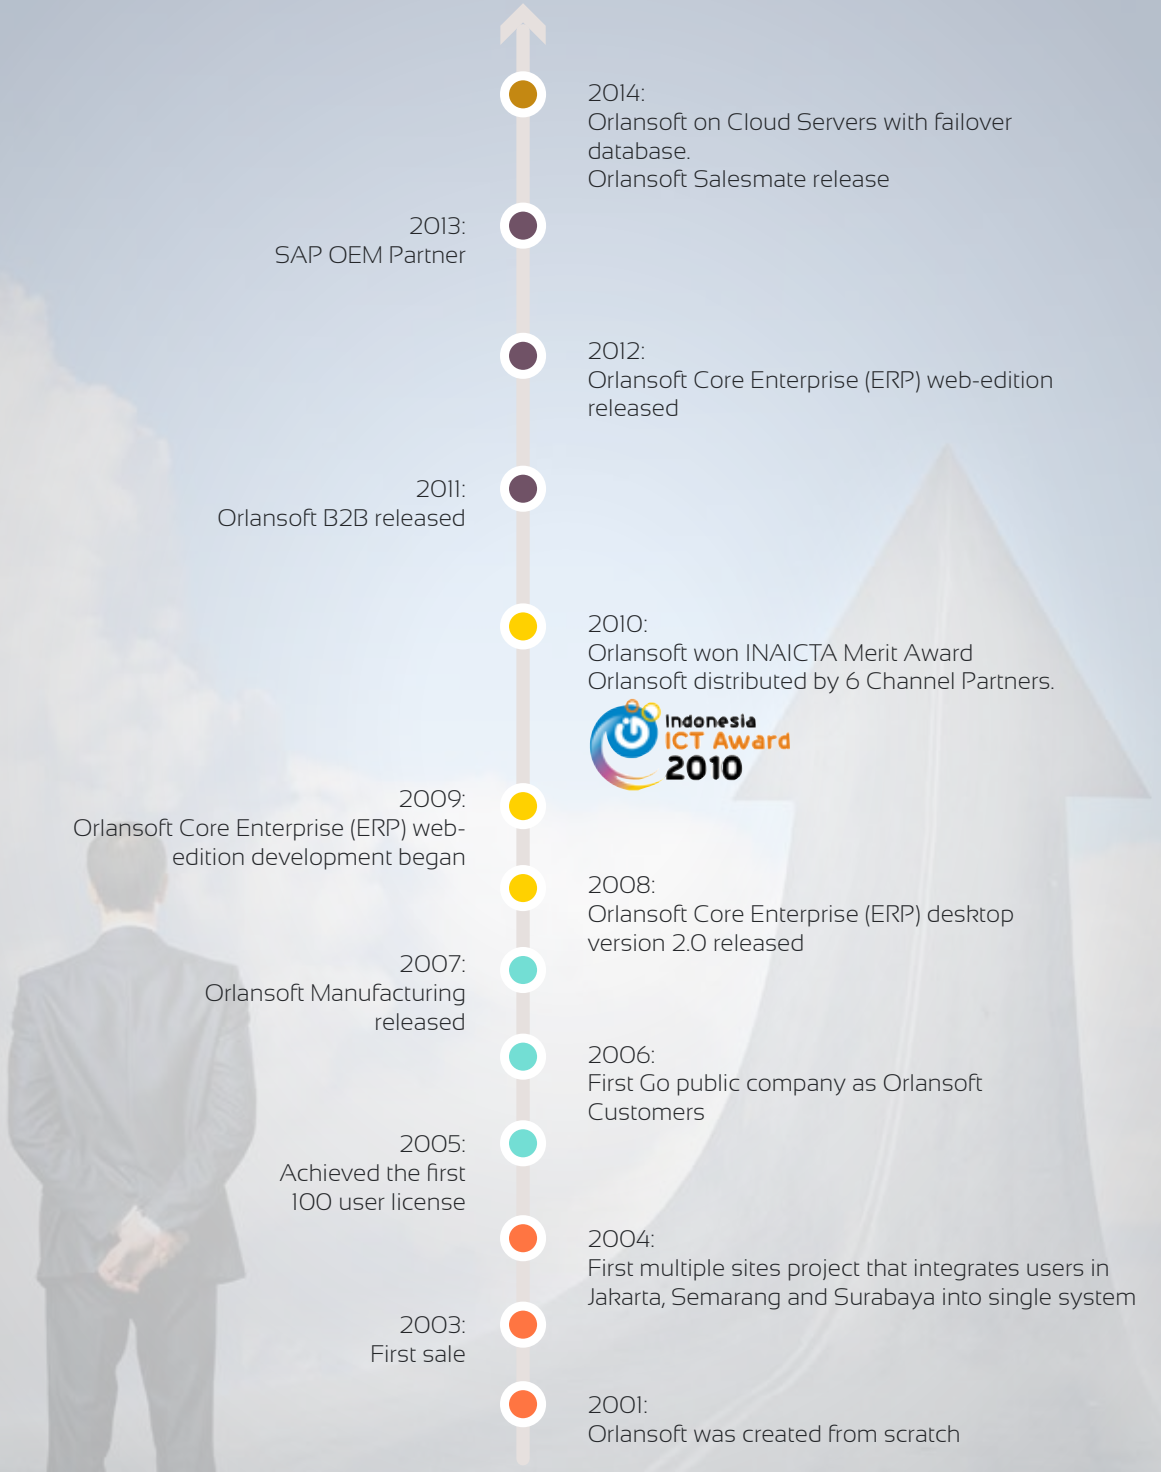

We strive to continuously build better Enterprise Business Systems that systemize, integrate, and optimize customer's business processes.

vision

To be the foremost information solutions company that stresses the use of less resources, optimization, and system integration for reliable business information

mission

Providing Enterprise Business Systems that systemize, integrate, and optimize business process and resources to achieve reliable business information

Orlandsoft Growth

Expertise

SYSTEMIZE. INTEGRATE. OPTIMIZE.

Systemize

Systemizing business processes into Orlandsoft ERP means spending less time and work to obtain critical information for your business using less resources. Get faster transition period when persons in charge of processes are replaced. Help organization to easily replicate the system to other sites for business coverage expansion. The system acts a template that is capable of being replicated to branch offices and subsidiaries, making new sites get productive and more manageable in less time.

Integrate

Orlandsoft helps customer to integrate users, processes and data in centralized database to **minimize redundant data entry**, reduce paper-based communication, **unify business operations** on single platform by providing a single view of master data (such as customers, suppliers, products) and provide on-demand access to critical **real-time information from single source of truth**.

Optimize

Orlandsoft help company to optimize business process and resources with following benefits:

1. **Streamline operation** by reducing: a) Transaction cost and processing time of order entry, order fulfillment, invoicing, procurement, and other processes. b) Cost calculation processing time. c) Monthly Closing Time.
2. Provide **tools to enhance control**. The system provides features like electronic approval and security settings that prevents users from overstepping their authorizations, at the same time giving authorized users discretionary measures to deal with exceptional cases which ultimately will be reported in the exception logs.
3. Real-time and **easy to access decision support information** help organizations improve sales and services. All critical information that is needed to run the enterprise is available at right place and at the right time, providing business decision makers with the tools to exercise considerable advantage over the competition.

Products

Orlansoft Core Enterprise

Orlansoft Core Enterprise is an ERP (enterprise resources planning) solution that provides a unified picture in a single software system that integrates and optimizes business processes, and delivers business information across entities and sites. Orlansoft Core Enterprise is designed to support core business processes. Some of the processes may be found in almost all line of business (such as Purchasing, Sales, AR Control, Centralized or Decentralized Account Payable and Cash Management, Fixed Assets Monitoring and General Ledger), while features like comprehensive Inventory Control is best associated with trading-distribution or service companies.

Orlansoft Salesmate

Orlansoft Salesmate is an Android based mobile application for order-taking salesman, canvasser and AR Collection. Sales call activities include visiting time on each customer with GPS validation, mobile ordering with invoice printing feature, collecting new customer information and its first order, AR collection, customer survey and daily sales achievement review. Offline mode transactions with background automatic synchronization to Orlansoft Core Enterprise will help salesman in taking customer order and submit the orders to branches or depots for shipping preparation or canvasser to report daily sales achievement.

Products

Orlansoft Point of Sale

Orlansoft Point of Sale is a Retail management system that provides an Offline and Online mode of POS client with seamless synchronization to POS Server. POS functionality can be deployed in all hardware platforms and peripherals with painstakingly crafted User Interface to enable high cashier productivity and seamless integration with Loyalty, Promotion, and Coupon in Orlansoft Core Enterprise

Orlansoft Manufacturing

Orlansoft Manufacturing is an Orlansoft Core Enterprise add-on for manufacturing management. The scope of Orlansoft Manufacturing integration extends from Production Scheduling, which drives Purchasing to complete orders for required material, to the management of production orders for finished goods alongside its intermediate items according to predefined work shifts and calendar, to material issue and returns, and also quality control check, including printout of inspection sheet and certificate of analysis, tools tracking, and finally to finished goods receipt, with or without rejected quantity. Orlansoft Manufacturing provides production costing with actual material consumption, labor, and machine usage for each production order therefore enabling the enterprise to analyze the efficiency of each production order and its revenue.
